CAREER OBJECTIVE

Motivated Computer Science undergraduate and fresher seeking an internship opportunity in software development or web development. Eager to apply my knowledge of programming, web technologies, databases, and version control while gaining practical industry experience, learning new technologies, and contributing effectively to a professional team.

EDUCATION

Swami Vivekananda Institute of Modern Studies

West Bengal, India

Bachelor of Computer Science (Pursuing)

Aug 2023 – Expected May 2026

Sodepur Sushil Krishna Sikshayatan For Girl(H.S)

West Bengal, India

Higher Secondary (Class XII) — (Score: 77%)

Jan 2021 – March 2023

TECHNICAL SKILLS

- **Programming:** C, Java, Python
- **Web Development:** HTML, CSS
- **Database:** MySQL
- **AI & Machine Learning:** ML Algorithms, Data Handling, Model Building
- **Version Control:** Git, GitHub
- **Other:** Computer Networking Fundamentals, MS Word, Excel, PowerPoint

CERTIFICATIONS & TRAINING

Industrial Training in AI with Machine Learning using Python

Euphoria GenX | September – November 2025

- Completed industrial training in Artificial Intelligence and Machine Learning using Python.
- Learned Python programming, machine learning algorithms, data handling, and model building.
- Successfully completed the training and received a certificate of completion.

Git & GitHub Training

ExcelR | August – September 2026

- Completed practical training covering Git fundamentals, repositories, branches, commits and GitHub workflows.
- Learned version control, collaboration and project hosting using GitHub.
- Successfully deployed portfolio website using GitHub Pages.

PROJECTS

Digital Canteen Management System

PHP Minor Project

Technologies: PHP, HTML, CSS, MySQL

- Developed a web-based digital canteen management system for browsing food items and placing food orders online.
- Implemented QR-code-based payment functionality for convenient online payments.
- Developed features for adding and editing food menu items.
- Implemented order history to view previous customer orders.
- Used MySQL database to store and manage food and order information.

Student Management System

Python Minor Project

Technologies: Python, Streamlit, Pandas, SQLite, SQL

- Developed a Student Management System for managing student records, marks and academic performance.
- Implemented CRUD operations to add, view, update and delete student data and marks using SQLite database.
- Built an interactive UI with Streamlit and implemented automatic grade and SGPA calculation features.
